

Correction

Drugs for the doctor's bag: 1-adults (DTB 2015; 53: 56-60.)

In the section on anaphylaxis in our article *Drugs for the doctor's bag: 1 – adults* we included as an option "adrenaline 300 microgram prefilled pen (it is important the user has been trained in its use)". However, this should have read "adrenaline 500 microgram prefilled pen (it is important the user has been trained in its use)" in accordance with the Resuscitation Council's guidelines.¹
